

# THREE DAY TWO'S NEWSLETTER

## OCTOBER 28-NOVEMBER 1, 2019

### Monday

What a busy week we had in our classroom! We found our sensory bin filled with animals and oats. We loved finding the matching animals like on Noah's Taiva-Ark, and making the different animal sounds. We also used our toy animals to make footprints in our play dough. We noticed that some animals, like our cow and horse, left larger footprints, while some animals, like our giraffe and bird, left smaller footprints. We read a flap book on animals, and tried guessing which animal was behind each flap by looking at its silhouette. When playing outdoors, we checked out our garden and looked for any growing fruits or vegetables. We also spoke about which ones we like to try. Rebecca noted that she eats green beans at home. Aria said that she likes tomatoes. Moshe said he loves vegetables! During Center Time, we used colors from the rainbow to paint our paper plates. Sage's favorite was the green paint- she covered every spot! We also celebrated another birthday this week- happy birthday to Noah! Thank you to Noah's Mom and Dad for bringing our class a birthday gift of a great collection of new tools for our play tough table! We have been very much enjoying them during morning Table Time!

### Wednesday

We introduced Noah and his animal friends to our class with fun finger puppets. We each said hello to Noah, and he said hello back to us! When it was Noah's turn to say hello, he noticed how his name sounded just like Noah's! We sang a song "Oh Mr. Noah had a Teiva", TTO Old McDonald Had a Farm. For our Wednesday special, we had a visit from the Nature of Things! Miss Lee brought in a bunch of little animal friends for us to meet. Those of us who wanted to, used our pointer fingers to very gently pet the animals. Nethanel was brave to pet all of them! Bella's favorite animal that came was the hamster. Gilad's favorite was the rooster, which flapped its wings and blew air all around us. Micah also liked the rooster best, in addition to Twiggy the stick bug. Lots of our friends also like the turtle's smooth shell. During Center Time, we got messy with finger paint. We used all the colors of the rainbow to cover our entire art table. We hung it up on our classroom wall so we can cut it into the shape of a rainbow when it dries!

### Friday

We started off our day by shaping our challahs. During Circle Time, we practiced singing our Noah song, and spoke about the rainbow that Noah saw in the sky after he came out of the Teiva. During Center Time, some of us rolled our sleeves up to do some full sensory animal scrubbing! We emptied our animal bucket to scrub them with sponges and shaving cream. At our other table, we had a giant rainbow covered with glue, and had all sorts of different art supplies out to choose from. We color sorted the supplies according to the rainbow, and then used the correct colors to cover each layer of the rainbow. We enjoyed our Shabbat sing along as usual!

Shabbat Shalom!
